713-364-5666

Katy, TX, 77493, United States

Freelance Web Dev, experienced in exceeding expectations. Proficient in HTML5 , CSS3 , and JavaScript, and learning Python, PHP, and C#. I find professional enjoyment in problem solving and analyzing, as well as planning and detail management. College graduate with an A.A.S. in Computer Programming, and currently on the road to an AAS in Artificial Intelligence with an interest in marketing and business management.

Work Experience

Shopify and WordPress Developer

Freelancer (Self Employed)

Oct 2020 - Present

Freelance ecommerce focused web development utilizing a wide array of tools and technologies to help small businesses scale and manage their digital assets.

- **Custom Shopify Apps**
 - Building and maintaining custom apps that utilize the Shopify API system, both REST API and GraphQL API, to fit client use cases.
- **Custom Shopify Themes**
 - Building and customizing client Shopify Themes utilizing Shopify Liquid, HTML, JS, and CSS. Incorporating custom functionality into themes with JS and various API based customizations. Theme building based on design specs, utilizing software like Figma and Adobe XD, to be pixel perfect per design files.

- **App Integrations**
 - Research, installation, and regular maintenance of market Apps to ensure client's desired functionality is met. This includes regular correspondence with App developers to troubleshoot issues, and then implementing fixes whenever bugs arise. Additionally, setting up pixel and PPC based tracking systems like Meta and Google Analytics.
- **API Feature Builds**
 - Designing and building custom functionality with external API systems to meet client's desired functionality and offer out of the box solutions using 3rd party systems.
- **WordPress Site Development**
 - Elementor and Divi page builder based WordPress builds, including plugin research and implementation. ACF implementations and optimization to fit client taxonomy requirements. Out of the box automation flows utilizing systems like Zapier, and integrating additional systems like Hubspot and Google Analytics.
- **WordPress Elementor Development**
 - Robust Elementor Pro based page and template building including custom CSS and implementing global re-usable sections and blocks. Page and template building based on design specs, utilizing software like Figma and Adobe XD, to be pixel perfect per design files.
- **WordPress ACF Development**
 - Thorough taxonomy building for special post types to fit client requirements.
- **Email Marketing**
 - Building templates, both HTML based and using systems like Klaviyo, and managing segments, lists, and running campaigns.
- **SEO**
 - Keyword research, semantic SEO friendly HTML structuring, and general SEO best practices. Running and maintaining SEO campaigns utilizing software like SEMRush and AHrefs.
- **Agency Contract Work**
 - Contracted through major agencies to help build and maintain their client's digital assets including websites, back end systems, and general strategic operations.
 - **YouShallThrive (W9 Contract - Agency)**
 - Aug 2023 - Present
 - Agency client who markets, manages, and develops digital assets for a wide array of high end clients.
 - Developing major theme modifications for Shopify
 - Building and modifying Shopify Liquid themes to meet client functionality needs, including custom functionality and API integrations.
 - Project Management
 - Utilizing Asana to manage project tasks and time tracking to stay on schedule and on budget for major client projects.
 - Sourcing and managing additional developer support

- Utilizing my freelancer network to source additional support members for complicated projects and delegating tasks to ensure thorough coverage across multiple phases of major projects.
- Robust feature research, development, and maintenance
 - Ongoing research, testing, and development of complicated functionality use cases including heavily modified Shopify components and 3rd party solutions to circumvent Shopify limitations.
- **PreHealth (W9 Contract - Agency)**
 - Jul 2023 - Aug 2024
 - Agency client who markets, manages, and develops digital assets for a wide array of high end clients.
 - Developing WordPress sites from scratch
 - Building brand new WordPress sites and incorporating all elements including site and page builds using Elementor Pro, plugin integrations like ACF, and Admin configurations.
 - Implementing robust plugin solutions for WordPress
 - Researching and utilizing systems like Zapier, Hubspot, and webhooks to automate internal WordPress systems. Also utilizing a plugin addition to Elementor that utilizes a PHP templating language called Twig to build out dynamic sections and blocks coupled with ACF fields.
 - Developing major theme modifications for Shopify
 - Ongoing custom functionality builds for existing client Shopify sites.

Lead Product Developer

Loyalty Clubs, LLC (W2 Employment)

Nov 2024 - July 2025

Holding company that builds and manages brands in the sweepstakes niche heavily utilizing custom Shopify builds and custom backend systems.

- **Developing major theme modifications for Shopify**
 - Building and modifying Shopify Liquid themes to meet functionality needs, including custom functionality and API integrations.
- **Project Management**
 - Utilizing Notion to manage project tasks and time tracking to stay on schedule and on budget for major projects.
- **Managing dev team operations**
 - Effectively managing dev team efforts to deliver projects on time and on budget.
- **Robust feature research, development, and maintenance**

- Ongoing research, testing, and development of complicated functionality use cases including heavily modified Shopify components and 3rd party solutions to circumvent Shopify limitations.

Shopify Developer

Lucyd Media (W2 Employment)

Feb 2023 - Aug 2023

Cannabis industry marketing and development agency helping cannabis related companies manage their digital assets.

- Theme customization
